

FLATLINE EQUIPMENT

Flatline Pumps

IceBreaker

High Pressure Piston Pumps

The high pressure piston pumps from Wagner are designed for airless and aircoat applications. Outstanding durability, very high reliability and unique features make the IceBreaker® the optimal choice for almost any high-pressure application.

Features

- The unique internal design of the motor and its special discharge valves drastically reduce ice formation and prevent accumulation to ensure superior performance and exceptional reliability.
- The fluid section has the option to be fitted with a high pressure fluid filter or release combo for a quick pressure release, fill or flush function.
- The pressure regulator is integrated with a safety air valve to ensure when it is closed that no pressure is left in the air motor.

C20

20:1 High Pressure Piston Pump

The C20 is designed with a 20 to 1 fluid ratio for higher viscosity materials and multi-gun operation. The fluid section and air motor are built for easy "field" repairs with fewer parts lowering maintenance costs and equipment down time.

Features

- Durable and dependable for continuous operation.
- 2 GPM displacement for multiple gun applications (up to 8 guns at 0.013 tip sizes).
- Various configurations ideal for any shop's setup.
- Ideal for solvent or water based materials.

Cobra 40:10

High Pressure Double Diaphragm Pump

The Cobra® is the first high-pressure pneumatic pump without packings, perfect for any kind of material including the most critical ones such as reactive paints (UV paints, isocyanate's, acrylics) or highly abrasive materials.

Features

- Minimized shearing effect.
- Reduced pulsation to ensure a consistent flow of material and a finer finish.
- Reduced solvent consumption: up to 60% savings during flushing procedures.
- Easy and fast color changes.
- Lower maintenance due to extremely low wear.

Flatline Guns

GA 4000

High Pressure Automatic Spray Gun

WAGNER'S GA 4000AC revolutionizes the automatic coating processes with excellent finishing quality and transfer efficiencies. The results are an efficient coating process with the best surfaces.

Features

- Superior atomization capabilities.
- Fast trigger speeds reduces overspray.
- Various configurations and flexible mounting options.
- Stainless steel fluid passages, ideal for solvent or water based materials.

Automatic Bobcat

High Pressure Automatic Spray Gun

The Bobcat Automatic Air Assist Airless gun is designed for production wood and metal finishing. Features include lightweight design, stainless steel fluid passages and encompasses a new revolutionary needle design that simplifies maintenance and cleaning.

Features

- Dependable for continuous operation.
- Quick and easy flush procedure saving time and minimizing wasted material.
- Various configurations ideal for any situation.
- Stainless steel fluid passages, ideal for solvent or water based materials.

GA 1030

Low Pressure Automatic Spray Gun

The GA 1030 provides excellent atomizing properties and high-quality finish results.

Features

- Up to 88% transfer efficiency and optimized air channel.
- Precision engineered components for an optimized fine finish atomization.
- Various configurations ideal for any situation.
- Stainless steel fluid passages, ideal for solvent or water based materials.

Why Wagner?

Wagner is a leading global manufacturer of systems for surface finishing of liquid paints, powder coating, adhesives and sealant materials. We offer a complete range of technologies to fit the materials you use – liquid and powder coatings, adhesives or other fluid media – from material transport to mixing, dosing, movement and control technology through to application. Our solutions, including tailor-made interface management, installation and after-sales services will become a valuable link within your entire production process.
